

You have been dreaming of a new home for years, and now your dream has become a reality. Your new log home is a work of art and Weatherall's Renaissance Program will show you how to treat it that way!

# Renaissance

*The Revival of Intellectual or Artistic Achievement and Vigor*

The Weatherall Renaissance Program is a natural extension of the exceptional customer service and high end coatings and sealants that Weatherall has become known for in the Log Home Industry.

## Weatherall Integrated System Options

Less than  
100 g/ltr  
VOCs

- **UV Guard® Interior and Exterior Wood Finish**

The UV Guard system is a three coat process that penetrates and seals the wood surface enriching the appearance of natural wood. Two heavy, back brushed, saturation stain coats followed by a clear top coat.

Less than  
55 g/ltr  
VOCs

- **UV Guard II® Interior and Exterior Wood Finish**

Finally, a True, Two-Coat System! UV Guard II achieves its superior level of protection in only two coats; one heavy, back brushed saturation coat of color followed by a clear top coat.

Less than  
32 g/ltr  
VOCs

- **UV Guard® Premium Caulk**

UV Guard® Premium Caulk is a professional strength sealant that forms a powerful adhesive bond and remains amazingly flexible, water resistant and weather tight for years to come.

Less than  
26 g/ltr  
VOCs

- **UV Guard® Textured Caulk**

UV Guard Textured Caulk is a highly elastic, textured caulk formulated from 100% pure acrylic resins. It was specifically developed for use on log homes and many other construction-related areas where maximum elasticity is required and where a textured appearance is desired for aesthetics.

Less than  
27 g/ltr  
VOCs

- **Weatherall Chinking Products**

Weatherall chinking products provide a resilient mortar textured finish that remains flexible and expands and contracts with normal log movement. Provides exceptional durability while withstanding weather and temperature conditions.

## Certified Applicator Program & Systems (C.A.P.S.)

The challenge of properly preparing and sealing your dream home can be an overwhelming task. Let us recommend one of our Weatherall certified applicators to professionally complete your masterpiece. We stress the importance of quality workmanship, and only certify those applicators who have trained using our integrated system of sealants and finishes to make sure you are completely satisfied with our products.

Weatherall Company, Inc. produces some of the most environmentally friendly products on the market today.

### Low VOC Emissions

Ask your Weatherall representative about our Go Green program.

## Maintenance Reminders

Once you are part of the Weatherall's Renaissance family, our professional technical support team will contact you yearly for home inspection tips and preventative maintenance measures. We will have all of your stain, caulk and chinking information on file in our office to insure you are protecting your work of art year after year.
